**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-32, drawn to a metallic seal, classified in class 277, subclass 591.
- II. Claim 33-47, drawn to a method of manufacturing, classified in class 29, subclass 888.01.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the seal can be made by a materially different method, for example instead of cutting a first annular edge, the edge could be constructed by melting and hot-forming the edge to the desired shape.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

An attempted telephone call was made to David Tarnoff Reg. No. 32,383 on March 7, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 3676

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
